Scientific Style and Format: The CBE Manual for Authors, Editors, and Publishers. Sixth Edition
Prepared by the Council of Biology Editors Style Manual Committee

A must for anyone – author, editor, publisher, student, translator, science writer – responsible for writing or publishing scientific material. The book recommends both general and scientific publication style and formats for journals, books, and other types of publications. The section "Special Scientific Conventions" covers every major scientific discipline from the electromagnetic spectrum to viruses to astronomy. Because both American and British preferences are included, the manual can be used by authors submitting papers to both US and international journals published in English and to settle disputes over international usage. *It is the most up-to-date, authoritative reference of its type available.*

704 pages, 1994, hardcover, 6 x 9 inches—**Out-of-print**
